

**fleet hub** SMOOTH OPERATIONS

Your Path to Seamless Fleet Management!

## Overview

We know that managing fleets is no walk in the park. It is a tough job balancing compliance and efficiency.

That's where FleetHub comes in. Our team has hands-on experience in fleet management, so we get how complex and challenging it can be. We have put in the work to create a solution that goes beyond the basics – thoroughly tested and customised to meet the specific needs of fleet managers.

At FleetHub, we understand the ins and outs, the hurdles, and the hard work that goes into overseeing all aspects of fleet operations. We are dedicated to providing a solution that truly works for you.

Our aim is to simplify the complexities of fleet management, making the process more efficient and easier to navigate. Here's an introduction of how FleetHub tackles these challenges, making your day-to-day in fleet management a bit smoother.

## Vehicle Management

Ensuring your fleet is compliant and road-worthy is a legal responsibility for employers. With FleetHub, all vehicle information, from MOT to service dates, is seamlessly stored, eliminating the risk of oversight. This comprehensive system ensures that every vehicle meets regulations and is proactively managed.

Simplify your control over leased or financed vehicles with FleetHub. Our system gives you a clear view of lease or finance end dates, keeping you one step ahead. You are able to monitor mileage against contract limits effortlessly and explore new vehicle options well before your lease expires. With FleetHub, you have the flexibility to customise notifications for each vehicle, ensuring you are never caught off guard by unexpected issues or additional fees due to contract violations.

Take control of your fleet's efficiency with detailed fuel analysis and emissions tracking. FleetHub allows you to assess each vehicle's suitability and efficiency, contributing not only to cost savings but also towards sustainable fleet management. An in-depth analysis of fuel data equips you with valuable insights, enabling informed decisions to enhance your fleet's overall efficiency and potentially guide the adoption of more fuel-efficient vehicles.

Analyse maintenance costs and upcoming expenditures effortlessly. Understand the financial impact of each vehicle and strategically plan for replacements. FleetHub simplifies pool car management, allowing easy booking of available pool vehicles based on specific driver needs and vehicle availability.

Budget and plan for vehicle replacements effectively and receive expert advice on optimising your fleet for maximum efficiency. With FleetHub, experience a streamlined approach to vehicle management that ensures compliance, cost-effectiveness, and sustainability.

# Driver Management

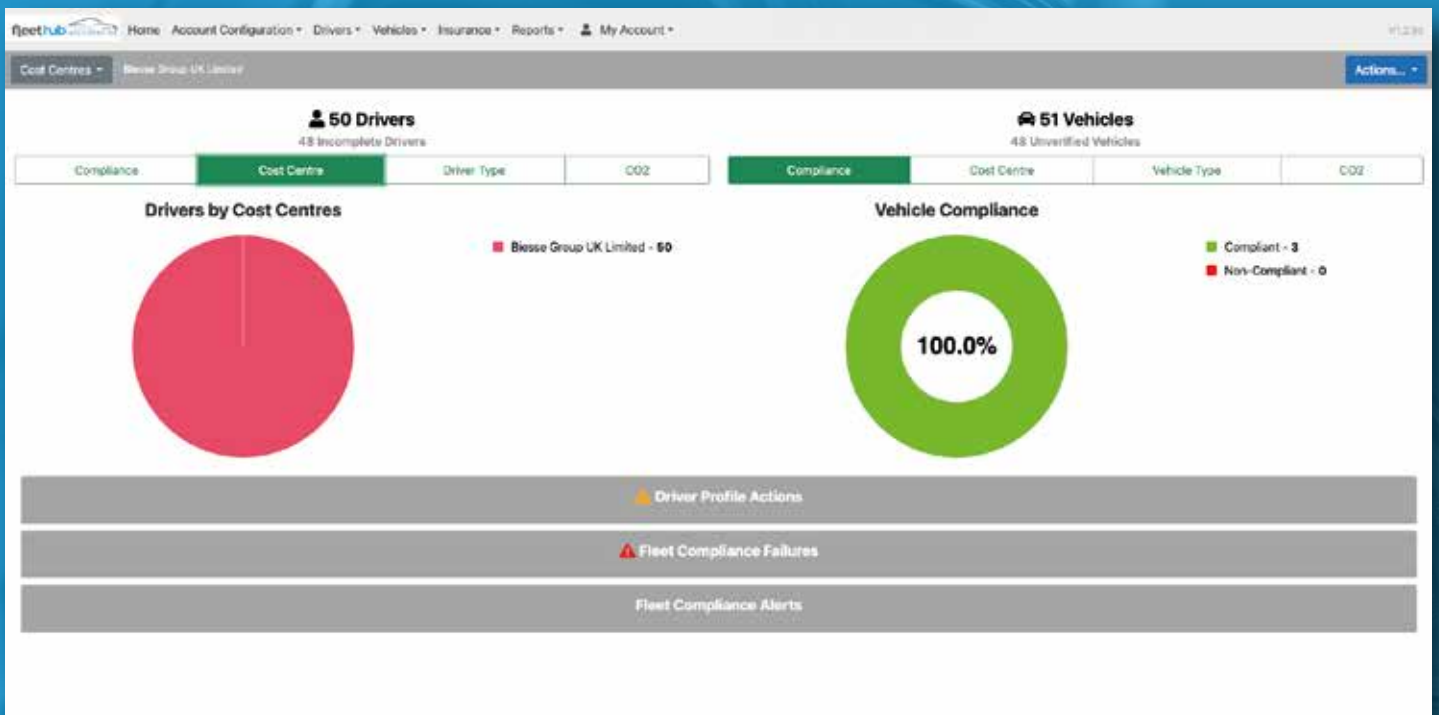

Efficient driver management is paramount for the safe and smooth operation of any fleet. FleetHub streamlines this process by allowing you to record all incidents and track these records to identify trends in driver behaviour or any recurring costs. This insight is crucial for effective management, as it enables you to identify and address errors promptly through detailed reports and data on specific trends.

Driver license information is securely stored in FleetHub, ensuring that all drivers are roadworthy and have undergone necessary checks. Accessing driver vehicle history becomes a breeze, helping in the allocation of fines, managing driving penalties, and addressing vehicle damages. This transforms what could be a tedious process of tracking

usage into a simple and efficient one, allowing you to see which vehicles have been used by whom and when.

With FleetHub, storing and accessing records of completed training, qualifications, policies, and upcoming or overdue training and assessments becomes seamless. You can rest assured that all drivers are up to date with required training, promoting safety and ensuring compliance.

Medical declarations, whether from previous or current health checks, are effortlessly managed in FleetHub. Set alerts in accordance with company policies for necessary medical checks, such as eyesight tests, to ensure the safety of all drivers. FleetHub helps you stay on top of your fleet management proactively, making safety and compliance easier to handle.

# Risk Management

As an employer, the duty of care extends to ensuring the health and safety of employees, whether the vehicles are privately owned, or company provided. It is essential to conduct regular inspections on all vehicles, ensuring they meet the required standards. Additionally, ensuring drivers comply with policies, possess the necessary training qualifications, and maintain valid driving licenses is a fundamental aspect of this duty of care.

With FleetHub, you can effortlessly centralise all this information, set reminders, and ensure that your company remains consistently up to date with compliance requirements. This proactive approach leads to an overall safe and efficient fleet, aligning with your duty of care obligations.

Ensuring both vehicles and drivers are compliant is pivotal. All vehicles must be fit for their intended purpose, and any failure in this aspect can result in fines and incidents, potentially leading to a breach of health and safety laws with serious consequences.

FleetHub provides a comprehensive solution to uphold your duty of care, mitigating risks and contributing to a safer working environment.

# Fleet Efficiency

Maintaining and running a fleet can be an expensive undertaking, with various operational costs ranging from fuel to maintenance. Effectively managing these costs is crucial to optimising fleet and business efficiency.

In FleetHub, you can easily track how much each vehicle is consuming in terms of fuel. This information allows you to identify vehicles that may be less economical to run, enabling you to explore alternatives when contracts end or when changes are made to ensure a more cost-effective solution.

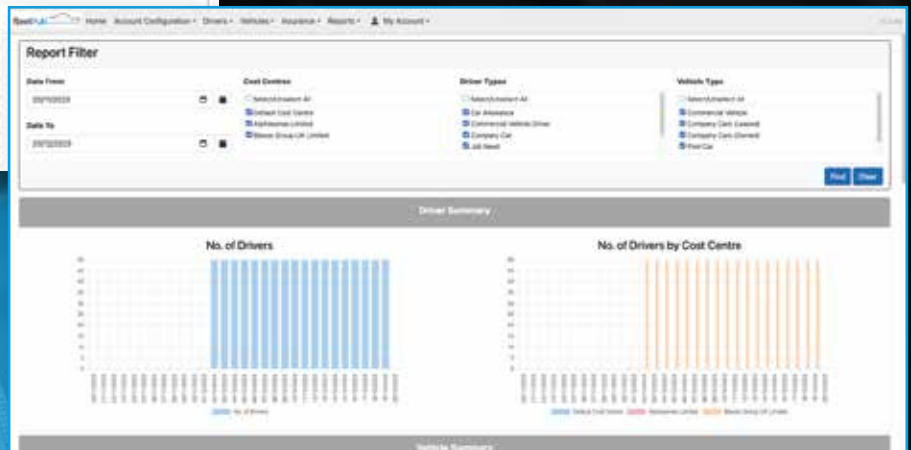

By making informed decisions about your fleet's fuel consumption, you can strategically save money and keep your fleet operating at its optimal level.

The wealth of vehicle data available on FleetHub is a powerful tool in identifying anomalies. Whether it is unusually high fuel costs or patterns of damage to specific vehicles,

FleetHub allows you to detect trends that may deviate from the norm. This insight enables efficient management, keeping you aware of vehicle-related costs and allowing you to understand the financial impact on your overall operations.

FleetHub empowers you to manage proactively and make informed decisions to enhance the financial efficiency of your fleet.

## Simplify Operations

In the complex world of fleet data management, a plethora of information exists, often scattered between paper and electronic formats. While many fleets resort to using spreadsheets to consolidate data, these tools are not optimally designed for efficient fleet management. Enter FleetHub – a solution that not only consolidates all your data in one accessible place but also provides seamless access from anywhere, ensuring swift retrieval whenever needed.

FleetHub goes beyond mere data storage; it streamlines operations by automating notifications, eliminating the need for manual checks. The system generates reports and analyses data, facilitating a proactive approach to compliance and ensuring optimal efficiency for your fleet.

Curious about every detail regarding your fleet? FleetHub allows you to spend less time searching for information and more time using it effectively. The system ensures the safety of all your data in one secure location, minimising the risk of information going missing or being misplaced.

Life becomes more straightforward with a comprehensive history of all vehicles and driver records readily available for reference when needed.

**FleetHub: making your fleet management tasks easier and more efficient.**
